NOTICE OF AVAILABILITY PROPOSED TOTAL MAXIMUM DAILY LOADS (TMDLs) FOR WATERS AND POLLUTANTS IN THE STATE OF ALABAMA

Section 303(d) of the Clean Water Act requires each state to compile a list of those waters within its boundaries for which technology based effluent limitations are not stringent enough to protect any water quality standard applicable to such waters. Listed waters are prioritized with respect to designated use classifications and the severity of pollution. In accordance with this prioritization, states are then required to develop Total Maximum Daily Loads (TMDLs) for those listed waters. The TMDL process establishes the allowable loadings of pollutants or other quantifiable parameters for a waterbody based on the relationship between pollution sources and in-stream water quality conditions, so that states can establish water quality based controls to reduce pollution from both point and non-point sources and restore and maintain the quality of their water resources (USEPA, 1991).

EPA established a TMDL to address nutrient impairment for Weiss Lake in the Coosa River Basin in 2004. The waterbody addressed by this TMDL is currently described as two distinct segments in Alabama's Intergraded 305(b)/303(d) report. EPA is proposing revised TMDLs for these segments, as described in the table below, based on new data and information.

Waterbody Name	County	Waterbody ID	§ 303(d) List Impairment
Weiss Lake	Cherokee	AL03150105-1003-102	Nutrients
Weiss Lake	Cherokee	AL03150105-1001-102	Nutrients

Persons wishing to comment on the proposed TMDLs or to offer new data or information regarding the proposed TMDLs are invited to submit the same in writing no later than September 29, 2008, to the U.S. Environmental Protection Agency, Region 4, Water Management Division, 61 Forsyth Street, S.W., Atlanta, Georgia 30303-8960, ATTENTION: Ms. Sibyl Cole, Standards, Monitoring, and TMDL Branch.

A copy of each of the proposed TMDLs can be obtained through the Internet or by contacting Ms. Cole at (404) 562-9437 or via electronic mail at cole.sibyl@epa.gov. The URL address for the proposed TMDLs is: <http://www.epa.gov/region4/water/tmdl/alabama>. The proposed TMDLs and supporting documents, including technical information, data, and analyses, may be reviewed at 61 Forsyth Street, S.W., Atlanta, Georgia, between the hours of 8:00 AM and 4:30 PM, Monday through Friday. Persons wishing to review this information should contact Ms. Cole to schedule a time for that review.
